Date: 23RD July 2013

SUBJECT: [REDACTED]
Manufacturing Integration Activities

Larry,

I write with regard to your company's support of Multimatic Dynamic Suspensions [REDACTED]

We wanted to take time to recognize the efforts of your team specifically in helping us achieve this major program milestone. The program has been one of the biggest we have undertaken as a division not only because of the volumes involved but also because of the most compressed nature of the project timeline. This brought us many challenges in integration that I am happy to say your team coped with admirably.

Your team's dedication, perseverance and lateral thinking/problem solving have played a major part in Multimatic Dynamic Suspensions ability to meet this major program milestone on time, on cost and with robust quality parts. Thank you.

I am sure that with such a diligent workforce your company can only succeed in its endeavors. We look forward to future opportunities with your company.

Regards and thanks

PAUL FREEMAN
