CenterLine Officially Launches PinPoint™ Solution

Windsor, Canada, 07/08/2020

CenterLine (Windsor) Limited is proud to officially announce the launch of a new product to our Configured Product Family. The PinPoint™ Solution is a unique product supplied as a configurable solution to feed parts into robotic lines and cells. The PinPoint™ Solution is designed to maximize production throughput, optimize operator utilization, and part flexibility.

According to Larry Koscielski,
Vice President of Process &
Technology Development –

“This solution encapsulates CenterLine’s best practices and lessons learned to overcome the challenges our customers face with production fastener welding. The PinPoint™ Solution is all about versatility. We have created a very simple concept to allow our customers to adapt to different scenarios and reliably feed parts into the cell.”

CenterLine PinPoint™ Solution

This intelligent machine tending solution is designed for simple integration and maintenance. In addition, it provides optimized operator utilization where one operator can load parts on more than one PinPoint™.

Parts are easily loaded on the pins and as they advance down the PinPoint™ Solution, they find their natural orientation which positions the parts to be repeatably picked up by the robot. The PinPoint™ Solution also includes vision validation to ensure the part type and location for robot pick-up.

A few application examples where the PinPoint™ Solution can be used include:

- CNC Machine Tending
- Build-in-sequence Traceability & Error Proofing
- Robotic Pack-out Cells
- Plastic Parts Post Processing.

The PinPoint™ Solution represents a significant evolution in CenterLine's existing industry-leading technology and is consistent with CenterLine's corporate vision to develop innovative solutions that enable our customers to exceed their operational, customer and profit commitments while minimizing their risk and stress.

To date, CenterLine has been awarded over 82 patents and has numerous North American and international patents pending.

For additional details on the PinPoint™ Solution or any of our other advanced automation configured products, visit our website at www.cntrline.com or contact us at info@cntrline.com.

###

About CenterLine (Windsor) Limited

CenterLine (headquartered in Windsor, Ontario) is a Canadian based, privately held corporation, specializing in advanced automation processes and technologies that satisfy resistance welding, metal forming, and cold spray application needs. It is established internationally with manufacturing and/or support facilities situated in the USA, Mexico, Brazil, Germany, Romania, India, and China which help support our customers' international operations. With over 60 years of business experience, CenterLine continues to develop technologies and processes that assist our customers in maintaining their competitive advantage.
