## CenterLine Announces Addition of New Plant

Windsor, Canada, August 24, 2017

CenterLine (Windsor) Limited is very pleased to announce a major investment that will add a new manufacturing plant to its existing campus of three (3) Windsor facilities located on Morton Drive. The greenfield construction project will be 85,000 sq.ft in size and consist of 72,000 sq.ft of manufacturing space and 13,000 sq.ft of office space. It will be located on a 5 acre parcel that fronts onto Morton Industrial Drive and be positioned to compliment existing operations.

The new company division will be dedicated to the manufacturing of several welding and joining brand products that have been developed & launched by Centerline over the last few years. Due to the rapid sales growth and strong customer acceptance of those products, this new facility will satisfy product demand without disruption or displacement of existing manufacturing processes currently performed at CenterLine's other facilities.

This announcement is the latest in a series of expansions that Centerline has undergone over the last 10 years as part of its continued growth. The success of its operations is a direct result of the tremendous skills and dedication of its staff and the strong leadership of its management team. This announcement is made as CenterLine celebrates its 60<sup>th</sup> anniversary and reinforces the company's ongoing commitment and confidence in our market and our region.

Construction is expected to begin shortly and be completed in time for a Spring opening.

### About CenterLine

CenterLine (headquartered in Windsor, Ontario) is a Canadian based, privately held, corporation specializing in advanced automation processes and technologies that satisfy resistance welding, metal forming and cold spray application needs. It is established internationally with manufacturing and service support facilities situated in the USA, Mexico, Brazil, Germany, Romania, India and China which help support our customer's international operations. With over 60 years of business experience, CenterLine continues to develop technologies and processes that assist our customers in maintaining their competitive advantage.
